PEDIATRIC NEUROLOGY
Subject Index Volume 15

Acetazolamide, with antiepileptic drugs, and growth suppression, 323
Adrenoleukodystrophy, arrested cerebral, a clinical and proton magnetic resonance spectroscopy study, 103
Anesthesia and rhabdomyolysis, 254
Anterior horn cells, synaptic alterations of in Werdnig-Hoffman disease, 32
Aphasia, selective language, from herpes simplex encephalitis, 169
Arteriovenous malformation, rupture of, and neonatal intracranial hemorrhage, 53
Ataxia with isolated vitamin E deficiency, 340
Autistic disorder, longitudinal examination of behavior, language, and social changes in, 217

Baclofen for chronic hiccups, 66
Benign rolandic epilepsy, similarities of EEG and seizures in del(1q), 261
Blood loss, perioperative, and effect of valproate, 19
Book reviews
  Atlas of EEG in the First Month of Life: A. W. DeWeerd/Author, 84
  Pediatric Cerebrovascular Disorder: E. S. Roach and Anthony R. Riela/Authors, 84
  Tropical Neurology: Raad A. Shakir, Peter K. Newman, and Charles M. Poser/Editors, 84
Brainstem frequency-following responses in Rett syndrome, 26

Callosal agenesis with developmental stutter, steroid therapy, 166
Carbamazepine, in neonatal diagnosis of Schwartz-Jampel syndrome, 172
Castleman syndrome, 61
Cerebral malaria, and perturbations of cerebral hemodynamics, 41
Child neurology and the Internet, 283
Child Neurology Society, organization of, 9
Chromosome 15q, infantile spasms associated with proximal duplication of, 163
Cockayne syndrome, 312
Cognitive function, and MRI features of cerebral lesions, in preterm spastic diplegic children, 207
Common carotid artery occlusion, fatal, and homocystinuria, 159
Corticosterone regulation, abnormal, in an immature rat model of continuous chronic stress, 114
Cytomegalovirus infection, late intrauterine, 249

Death, sudden unexpected, and novel mutation in the mitochondrial DNA tRNA glycine gene, 145
del(1q) and benign rolandic epilepsy, similarities of EEG and seizures in, 261
Developmental delay, psychomotor, and bilateral internal carotid artery agenesis, 76
Developmental disability, clinical features of, and cerebellar hypoplasia, 224
Down syndrome and tuberous sclerosis, brain and eye pathology in, 57
Down syndrome brains, adult, and excessive glutamate receptor 1 immunoreactivity, 203
Dystonia, autosomal dominant torsion, with onset in infancy, 245

Edema, hypsarrhythmia, and optic atrophy, and progressive encephalopathy, 337
EEG
  Quantitative, in long-term survivors of acute lymphoblastic leukemia, 293
  Similarities of, and seizures in del(1q) and benign rolandic epilepsy, 261
Encephalitis, herpes simplex, and selective language aphasia, 169
Encephalopathy, progressive, with edema, hypsarrhythmia, and optic atrophy (PEHO syndrome), 337
Epilepsy
  And fragile X gene mutation, 358
  Benign rolandic, and similarities of EEG and seizures in del(1q), 261
Eye and brain pathology in an infant with Down syndrome and tuberous sclerosis, 57

Fragile X gene mutation and epilepsy, 358
Fiber type disproportion, congenital, and Krabbe disease, 79

Gliosis and substance P relationship in medulla oblongata in neonatal sudden infant death syndrome, 189
Glutamate in cerebrospinal fluid, high levels in Rett syndrome, 213
Glutamate receptor 1 immunoreactivity, excessive, in adult Down syndrome brains, 203
Growth suppression in children receiving acetazolamide with antiepileptic drugs, 323

Head trauma, postural stability by computerized posturography, 299
Hematoma, intracranial, in experienced teenage equestrians, 235
Hemidystonia, acquired, a clinical and neuroradiological study, 108
Hemodynamics, cerebral perturbations in Kenyans with cerebral malaria, 41
Hiccups, chronic, and baclofen, 66
Homocystinuria presenting as fatal common carotid artery occlusion, 159
Hypercapnia, seizure susceptibility during recovery, 36
Hyperglycinemia, nonketotic, prognostic clues and outcome of early treatment, 137
Hypoplasia
  Cerebellar, and clinical features of developmental disability, 227
  White matter, and ventriculomegaly, delayed myelination, and "periventricular" leukomalacia, how are they related?, 127
Hypsarrhythmia, edema, and optic atrophy, with progressive encephalopathy, 358

Immunomodulation, and metachromatic leukodystrophy neuropathy, 237
Infantile spasms, associated with proximal duplication of chromosome 15q, 163
Inflammatory spinal epidural mass (Castleman syndrome), 60
Internal carotid artery agenesis, bilateral, with psychomotor developmental delay, 76
Internet and child neurology, 283

Krabbe disease, late infantile, serial MRI and neurophysiological studies in, 217
Krabbe leukodystrophy and congenital fiber type disproportion, 79

Language, behavior and social changes, longitudinal examination in population with autistic disorder, 217
Leigh syndrome associated with mitochondrial DNA 8993 T→G and ragged-red fibers, 73
Lennox-Gastaut syndrome associated with leukoencephalopathy, 62
Lesions, cerebral, and cognitive functions, MRI features of in preterm spastic diplegic children, 207
Leukemia, acute lymphoblastic, quantitative EEG in long-term survivors, 293
Leukocyte adhesion molecules and x-ray energy dispersive spectroscopy in Sturge-Weber disease, 332
Leukomalacia, ''periventricular,'' and ventriculomegaly, delayed myelination, white matter hypoplasia, how are they related?, 127
Lupus erythematosus, and central nervous system vasculopathy, 124
Lyme neuroborreliosis masquerading as a brainstem tumor, 258

Magnetic resonance spectroscopy, proton, study of arrested cerebral adrenoleukodystrophy, 103
Malaria, cerebral, and perturbations of cerebral hemodynamics, 41
Medulla oblongata, relationship of substance P and gliosis, and sudden infant death syndrome, 189
Meningoencephalitis, primary amoebic, with *Naegleria fowleri,* 230
Metachromatic leukodystrophy, neuropathy of, and improvement with immunomodulation, 237
Migraine, confusional, 23
Mitochondrial DNA 8993 T→G mutation and ragged-red fibers, and Leigh syndrome, 73
Mitochondrial DNA tRNA glycine gene, novel mutation in, and sudden unexpected death, 145
MRI features of cerebral lesions and cognitive functions in preterm spastic diplegic children, 207
MRI, serial, and neurophysiological studies in late infantile Krabbe disease, 240
Muscular dystrophy, Fukuyama type congenital, morphological study of brainstem in, 327
Mutism, acquired neurologic, 352
Myelination, delayed, and ventriculomegaly, white matter hypoplasia, and ''periventricular'' leukomalacia, how are they related?, 127
Myopathy
  Early-onset, with tubular aggregates, 68
  Mitochondrial, simulating spinal muscular atrophy, 153
  Neonatal, perifascicular, 150

Naegleria fowleri, and primary amoebic meningoencephalitis, 230
Neonatal hemorrhage, intracranial, due to rupture of arteriovenous malformation, 53
Neuronal ceroid-lipofuscinosis, classical late infantile, neuroradiological findings, 344

Optic atrophy, edema, and hypsarrhythmia, and progressive encephalopathy, 337

Panencephalitis, subacute sclerosing, long-term survival and temporary clinical improvement, 83
PEHO syndrome, 337
Pena-Shokeir phenotype associated with bilateral opercular polymicrogyria, 348
Polymicrogyria, bilateral opercular, and Pena-Shokeir phenotype, 348
Postural stability by computerized posturography in minor head trauma, 299
Posturography, computerized, postural stability in minor head trauma, 299
Preterm spastic diplegic children, cognitive function and MRI features of cerebral lesions in, 207
Proton magnetic resonance spectroscopy study of arrested cerebral adrenoleukodystrophy, 103

Radiosurgery, stereotactic, 193
Ragged-red fibers and mitochondrial DNA 8993 T→G mutation, and Leigh syndrome, 73
Rett syndrome
  And brainstem frequency-following responses, 26
  High levels of cerebrospinal fluid glutamate in, 213
Rhabdomyolysis and anesthesia, 254

Schwartz-Jampel syndrome, neonatal diagnosis with dramatic response to carbamazepine, 172
Seizure susceptibility during recovery from hypercapnia in neonatal dogs, 36
Seizures, neonatal, interobserver variability in classification of, 120
SIDS, neonatal, and relationship of substance P and gliosis in medulla oblongata, 189
Social, behavioral and language changes, longitudinal examination in population with autistic disorder, 217
Spasms, infantile, associated with proximal duplication of chromosome 15q, 163
Spastic diplegic children, preterm, MRI features of cerebral lesions and cognitive function in, 207
Spectroscopy, x-ray energy dispersive, and leukocyte adhesion molecules in Sturge-Weber disease, 332
Speech, language, and communication disorder evaluation, and clinical characteristics of children referred to a child development center, 305
Spinal muscular atrophy, simulating mitochondrial myopathy, 153
Steroid therapy, and disappearance of developmental stutter in patient with callosal agenesis, 166
Sturge-Weber disease, and leukocyte adhesion molecular and x-ray energy dispersive spectroscopy, 332
Stutter, developmental, with callosal agenesis disappears during steroid therapy, 166
Subacute sclerosing panencephalitis, long-term survival and temporary clinical improvement, 83
Substance P and gliosis, relationship in medulla oblongata in neonatal sudden infant death syndrome, 189
Sudden infant death syndrome, neonatal, relationship of substance P and gliosis in medulla oblongata, 189

Tuberous sclerosis and Down syndrome, brain and eye pathology in, 57
Tubular aggregates and early onset myopathy, 68
Tumor, brainstem, Lyme neuroborreliosis masquerading as, 258
Turner syndrome, developmental changes in motor function, 317

Valproate, effect on perioperative blood loss, 19
Vasculopathy, central nervous system, in neonatal lupus erythematosus, 124
Ventriculomegaly, delayed myelination, white matter hypoplasia, and ''periventricular'' leukomalacia, how are they related?, 127
Vitamin E deficiency, isolated, and ataxia, 340

Werdnig-Hoffman disease, and synaptic alterations of anterior horn cells, 32
West syndrome, associated with proximal duplication of chromosome 15q, 163
